

## EGOLF AGREEMENT 023-2016

Subject of Agreement	<b>Aluminium foil tray</b>
Related test standard	EN ISO 11925-2:2010
Date of issue	
Reference original query	TC1 question arising from course in March on EN 11925 test method, concerning required 0.175 mm thickness of aluminium tray
Previous publication number (if applicable)	EGR 76rev2
Keywords (max. 20)	aluminium, aluminum, foil, tray

### Problem

Paragraph 4.11 of EN ISO 11925-2:2010 specifies the thickness of the aluminium foil used for the tray:  $(0,175 \pm 0,025)$  mm.

Question: can thinner aluminium foil be used for the tray?

### Recommendation

EGOLF agrees that the thickness of the aluminium foil will not significantly influence the test results. Therefore any aluminium or aluminium foil can be used for the tray.
